

1) First page

```
In [4]: from bs4 import BeautifulSoup
import pandas as pd
import requests

# Base URL for Quotes to Scrape
url = "http://quotes.toscrape.com/"
response = requests.get(url)

# Parse the HTML content
soup = BeautifulSoup(response.text, "html.parser")

# Find all quote containers on the page
quote_boxes = soup.find_all("div", class_="quote")

quotes_data = []

for box in quote_boxes:
    text = box.find("span", class_="text").get_text()
    author = box.find("small", class_="author").get_text()
    tags = [tag.get_text() for tag in box.find_all("a", class_="tag")]

    quotes_data.append({"Quote": text, "Author": author, "Tags": ", ".join(tags)})

# Convert into a Pandas DataFrame
df = pd.DataFrame(quotes_data)
df
```

Out[4]:

	Quote	Author	Tags
0	"The world as we have created it is a process ...	Albert Einstein	change, deep-thoughts, thinking, world
1	"It is our choices, Harry, that show what we t...	J.K. Rowling	abilities, choices
2	"There are only two ways to live your life. On...	Albert Einstein	inspirational, life, live, miracle, miracles
3	"The person, be it gentleman or lady, who has ...	Jane Austen	aliteracy, books, classic, humor
4	"Imperfection is beauty, madness is genius and...	Marilyn Monroe	be-yourself, inspirational
5	"Try not to become a man of success. Rather be...	Albert Einstein	adulthood, success, value
6	"It is better to be hated for what you are tha...	André Gide	life, love
7	"I have not failed. I've just found 10,000 way...	Thomas A. Edison	edison, failure, inspirational, paraphrased
8	"A woman is like a tea bag; you never know how...	Eleanor Roosevelt	misattributed-eleanor-roosevelt
9	"A day without sunshine is like, you know, nig...	Steve Martin	humor, obvious, simile

2) Scraping Multiple Pages (Pagination)

Because quotes span across multiple pages, you can write a loop that automatically navigates through them until no more pages remain:

```
In [6]: all_quotes = []
page = 1

while True:
    url = f"http://quotes.toscrape.com/page/{page}/"
    response = requests.get(url)

    # If the page doesn't exist (e.g., 404 error), break the loop
    if response.status_code != 200:
        break

    soup = BeautifulSoup(response.text, "html.parser")
    quote_boxes = soup.find_all("div", class_="quote")

    for box in quote_boxes:
        text = box.find("span", class_="text").get_text()
        author = box.find("small", class_="author").get_text()
        tags = [tag.get_text() for tag in box.find_all("a", class_="tag")]
        all_quotes.append({"Quote": text, "Author": author, "Tags": ", ".join(tags)})
```

```
# Check if a "Next" button exists; if not, you've reached the last page
next_btn = soup.find("li", class_="next")
if not next_btn:
    break

page += 1

# Convert full multi-page dataset to DataFrame and save
df_all = pd.DataFrame(all_quotes)
df_all.to_csv("quotes_scraped.csv", index=False, encoding="utf-8")
print(f"Successfully scraped {len(df_all)} quotes across {page} pages!")
df_all
```

Successfully scraped 100 quotes across 10 pages!
